

Project Wetland Data Disclaimer

CDOT staff and consultants collect wetland boundary data for project development. Data found in OTIS are limited to wetland delineations completed for CDOT projects and CDOT/FHWA-funded projects beginning in 2017 with a few exceptions dating to before 2017. Project information will be populated on the GIS platform as it is collected.

Absence of wetland polygons within an area does not indicate absence of wetlands. Additionally, wetland delineations legally expire after five years. Data found on this GIS platform should not be used in lieu of field investigations.

Any questions regarding the wetland data should be referred to the CDOT Wetland Program Manager, Becky Pierce @ rebecca.pierce@state.co.us or 303-512-4051.
