Figure 1 illustrates the experimental setup. A subject is seated at a table, viewing a video screen. A video camera is positioned above the screen. A target is placed on the table. A horizontal arrow indicates the direction of movement from the starting point to the target. A vertical arrow indicates the direction of movement from the starting point to the video screen. Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard diet, while the experimental group received a diet supplemented with 10% of the total energy from fat. The subjects were then divided into two subgroups: the control subgroup and the experimental subgroup. The control subgroup received a standard diet, while the experimental subgroup received a diet supplemented with 10% of the total energy from fat. A schematic diagram of the experimental setup. It shows a subject seated at a table, viewing a video screen. A camera is positioned above the screen. A horizontal line is drawn on the screen, representing the horizontal plane. A vertical line is drawn on the screen, representing the vertical plane. The subject's hand is positioned near the intersection of these lines. The diagram is labeled with 'A' and 'B' at the bottom.
