A horizontal scale bar labeled "SCALE OF MILES" at the top. The scale is marked with numbers 0, 1/2, 1, 2, 3, and 4. The distance between 0 and 1/2 is divided into four equal segments, and the distance between 1/2 and 1 is also divided into four equal segments, indicating a scale of 1/8 mile per segment.

GENERAL NOTES

This project is to be constructed in conformity with the STANDARD SPECIFICATIONS of the COLORADO DEPARTMENT OF HIGHWAYS, adopted January 1, 1958

All quantities on preliminary plans are to be considered approximate only.

The ENGINEER shall establish grades and locations for all posts. Wood posts shall be set and tamped firm and plumb. U-2 channel posts shall be driven plumb or set in the same manner as wood posts

In computing areas of sign panels, the areas shall be based on geometrical squares, rectangles, and triangles. Odd shapes, such as Shields, Octagons, etc are to be figured on the basis of the following examples:

INTERSTATE: 3' X 3' or 2' X 2' SQUARE OCTAGON: 2'-6" X 2'-6" or 4' X 4' SQUARE
U. S. SHIELD: 35" X 30" RECTANGLES YIELD PANEL: 5' EQUILATERAL TRIANGLE

"FEDERAL SPECIFICATIONS, STANDARDS AND HANDBOOKS", referred to in these plans, and SPECIAL PROVISIONS are available at the BUSINESS SERVICE CENTER, BLDG. 41, DENVER FEDERAL CENTER.

MILITARY SPECIFICATIONS, (Designated as "MIL") are available from the AIR MATERIEL COMMAND, WRIGHT-PATTERSON AIR FORCE BASE, OHIO. (ATTN. E.W.B.F.E.)

IDENTIFICATION SIGNS Shall be placed at Sta. 420±RT. and Sta. 1772 ±LT.

Excavation for construction of Sign Islands to be obtained within the project limits as staked by the Engineer.

Modified Compaction is to be used on project.
